

Personal information

Name: André Elias Perry da Câmara.
Address: Quintanilha PT.
Phone: +351 928 308 015.
e-mail: eliaspc2@gmail.com.
Birthdate: 2 de março de 1979.
Birthplace: Porto (Portugal).

Key skills

Cybersecurity & Operational Security

- **Cybersecurity Fundamentals** — security principles applied to systems, networks, software, and operational environments
- **Risk Analysis & Management** — identification of threats, vulnerabilities, impact, and mitigation measures
- **Access Control & Identity Management** — authentication, authorization, user lifecycle, and privilege management awareness
- **Security in Operational Environments** — secure handling of systems and information in regulated and business-critical contexts
- **Security by Design** — integration of security, resilience, and operational continuity into systems and services
- **Software Security** — secure development principles and awareness of software-related vulnerabilities
- **Data Protection & Governance** — privacy, responsible data handling, governance, and information security concepts
- **Incident-Oriented Mindset** — troubleshooting, root-cause analysis, escalation, and operational response in high-pressure environments

Currently completing a **Level 5 Cybersecurity CET**, with a strong practical focus on security, risk management, resilience, and operational continuity. Previous IT support experience and ongoing training in programming and data provide a broader technical foundation for cybersecurity work.

IT Support & Systems

- Advanced troubleshooting across applications, operating systems, networks, and enterprise environments
- **Incident & Problem Management** — ServiceNow, Jira, Remedy
- **User & Access Management** — Active Directory, Microsoft Intune
- **Remote Support** — TeamViewer, Dameware, Goverlan
- **Operating Systems** — Windows and Linux
- **Root-Cause Analysis** — structured diagnosis of recurring and complex technical issues
- **SLA-Driven Operations** — prioritization, escalation, and service continuity in business-critical environments

More than ten years of IT support experience provides a strong operational understanding of real-world systems, users, incidents, access control, and service reliability — all directly relevant to cybersecurity.

Programming & Automation

- **Python** — scripting, automation, and security-oriented logic
- **Algorithms & Data Structures** — structured problem solving and control flow
- **Object-Oriented Programming** — modularity, encapsulation, and maintainable code
- **Automation & Scripting** — task automation and repeatable operational workflows
- **Secure Development Awareness** — applying structured and maintainable coding practices with security considerations
- **Problem Solving** — translating operational needs into reliable technical solutions

Programming training supports cybersecurity through automation, scripting, secure development awareness, and better understanding of how software behaves and fails.

Data & Information Management

- **Python for Data Analysis** — developing skills in cleaning, transformation, and exploratory analysis
- **SQL & Data Management** — querying, storage, ingestion, transformation, and modelling fundamentals
- **Data Governance** — information management, privacy, governance, and responsible data handling
- **Data Visualization & Analysis** — developing analytical and reporting skills
- **Business Intelligence Fundamentals** — analytical reporting and BI project concepts

Currently undertaking a **1000-hour Information Management & Data Science programme**. Its relevance to cybersecurity is mainly in **data governance, data protection, information management, SQL, automation, and analytical reasoning**, rather than as a separate career track. O programa inclui precisamente governança de dados, proteção de dados, segurança no desenvolvimento de software, Python, SQL, armazenamento, ingestão e transformação de dados.

Cloud & Virtualization

- **VMware vSphere** — administration fundamentals and monitoring
- **Virtualized Environments** — understanding of virtual machines, infrastructure dependencies, and resource management
- **Availability & Resilience** — awareness of continuity, monitoring, and infrastructure reliability
- **Infrastructure Security Context** — understanding of how infrastructure design affects exposure, availability, and resilience

Virtualization knowledge complements cybersecurity by providing a clearer understanding of infrastructure architecture, dependencies, availability, and attack surface.

Business & Enterprise Tools

- **Microsoft 365** — advanced Excel user; Outlook, Teams, SharePoint
- **Enterprise Applications** — Bloomberg, Reuters, Oracle
- **Business-Critical Environments** — experience supporting financial and operational systems where confidentiality, integrity, and availability are essential
- **Technical Documentation** — incidents, procedures, configurations, and operational solutions

Communication & Collaboration

- Clear communication with technical and non-technical stakeholders
- Strong prioritization in **high-pressure, SLA-driven environments**
- Experience handling incidents, escalations, and user expectations
- **Portuguese** — native
- **English** — proficient
- **Spanish** — proficient
- **French** — intermediate

Education

High School Diploma / Secondary Education – Completed in 2025.

Computer Programmer EFA – Adult Education and Training (Level 4), Tecnisign, total of 1416 hours (**1150h training + 210h internship + 56h portfolio**). Ongoing since **September 2025**, professional internship scheduled to start in **July 2026**.

Cybersecurity CET – Technician Specialist (Level 5), Multiformactiva
Total of **1510 hours**, post-work program running over approximately **18 months**, with a strong practical focus on security, risk management, and operational continuity. Includes an extensive **485-hour professional internship**. Ongoing since **February 2026**.

Information Management & Data Science – Specialized Training, Tecnisign
1000 hours, e-learning programme. **Ongoing since September 2026**.
Training in Python, SQL, data analysis, data cleaning and transformation, data visualization, analytical modelling, data governance, business intelligence and data management.

Professional training

TEFL – Teacher of English as a Foreign Language, TEFL Graduate (12h). Completed on June 15, 2026.

Programming MOOC 2025 – Advanced Course in Programming, University of Helsinki (~135h). completed on October 21, 2025.

Programming MOOC 2025 - Introduction to Programming, University of Helsinki (~135h), completed on September 6, 2025.

UFCD 9214 – Digital Marketing (25h), funded by IEF, completed in September 2025.
Digital Marketing Course, provided by Talento, total of 78 hours, from March to September 2025.

Python Programming Course, intensive 200-hour full-time course, funded by IEF, July to August 2025.

Supporting and Troubleshooting Windows 10 Course, completed at CAS Training (Madrid, Spain) with a duration of 30 hours, finished on March 31, 2017.

Principles and Fundamentals of Networking Course, completed at Anadat Consulting (Rivas Vaciamadrid, Spain) with a duration of 18 hours, completed on June 10, 2014.

Basic Administration of VMWare VSphere Course, completed at Anadat Consulting (Rivas Vaciamadrid, Spain) with a duration of 18 hours, completed on May 13, 2014.

Hardware Computer Course – Expert, completed at the Advanced Center of Computer and Training (Master Computer) (Lisbon, Portugal) with a duration of 52.5 hours, finished on June 21, 1999.

Languages

Portuguese: Native.

Spanish: Proficient User - High level of written and excellent oral proficiency.

English: Proficient User - High level of written and excellent oral proficiency.

French: Independent User - Good written and oral proficiency.

Professional experience

Core Professional Experience:

IT Support:

Level 1 Local IT Support Technician for BNP Paribas campaign at Devoteam (Lisbon, Portugal) from February 2019 to August 2024.

Level 1 IT Support Technician for BNP Paribas campaign at CAS Training (Madrid, Spain) from September 2016 to September 2018.

Level 1 IT Support Technician for CEPESA campaign at Tecnocom (Madrid, Spain) from September 2014 to September 2016.

Level 0 and Level 1 IT Support Technician for various Telefónica Cloud Computing campaigns at Anadat Consulting (Rivas Futura, Spain) from February 2013 to August 2014.

Previous Professional Experience:

Call Center:

Teleoperator for Nokia Portugal campaign at Sitel Ibérica Teleservices, S.A. (San Fernando de Henares, Spain) from March 2012 to December 2012.

Tourism:

Receptionist and Tour Guide at Quinta Nova de Nossa Senhora do Carmo Rural Hotel (Covas do Douro, Portugal) from March 2010 to February 2012.

Hospitality:

Bartender and Dining Room Attendant at LBV 79 Restaurant-Bar (Pinhão, Portugal) from September 2009 to March 2010.

Bar:

Bartender and Waitstaff at Labirintho (Porto, Portugal) from February 2006 to May 2008.

Sales and Marketing:

Salesperson at General Ótica – Norteshopping Shopping Center (Matosinhos, Portugal) from November 2003 to November 2004.

Sales Representative in the Professional Internet Department of TV Cabo (Porto, Portugal) from May 2003 to September 2003.

Hospitality:

Employee at Sugestões e Opções – Restaurant at Jardins do Palácio de Cristal (Porto, Portugal) from August 2002 to May 2003.

Employee at Pans & Company at Maia Shopping Mall (Maia, Portugal) from March 2002 to July 2002.

Tourism:

Room Attendant at Clarion Hotel Royal Christiania (Oslo, Norway) from August 2000 to March 2001.

IT:

IT Technician with administrative responsibilities at Cofanor – Cooperativa dos Farmacêuticos do Norte, S. A. (Porto, Portugal) from October 1999 to April 2000.
